Detail Setup Skype Virtual Phone Interface Steps:

The details guiding steps for 1st time user to follow:

Connect computer with Big Screen TV.
Set Big Screen TV as Primary Displayer and Computer Monitor as 2nd Displayer.

Step 1: Prepare your computer for Skype Desktop Program to be ready for Magic iRIID Virtual Phone Interface program.

This App is designed and tested for Skype for Desktop program v 7.5.0.102.

Important!
Please follow the enable the Skype program HOTKEY features with specific Key settings..

E. Open Skype program, Click Tools on menu bar, Click "Options", Click "Advanced", Click "Hotkeys", Checked "Enable keyboard shortcuts", Checked Active, Double click on each active and Set up the Hotkeys as follow, and Click "Save" button.

Hotkeys Setting:

F. Click "HangUp" (Alt+PdGn)
G. Click "AnserCall" (Alt+ PgUp)
H. Click "AnserVideoCall" (Ctrl+Alt+PgUp)
I. Click "IgnoreCall" (Ctrl+Alt+Shift+I)
J. Click "Decline" (Ctrl+Alt+PgDn)
K. Click "Focus" (Ctrl+Alt+Shift+F)
L. Click "SearchPeople" (Ctrl+Alt+Shift+S)
M. Click "Mute" (Ctrl+Alt+Shift+M)

Step 2: To open Skype account and login, have add other Skype user in the contact list.

Step 3: Move Skype program to show on big TV screen.

Step 4: Open Magic iRIID Virtual Phone Interface program,
*Move Magic iRIID Virtual Phone Interface Program show on computer monitor.

When you move hands, Magic iRIID Virtual Interface App will display visual feedback on the monitor/displayer. You can see which keys that you have selected on.

Step 5: Click virtual key "iRIID", to show iRIID Main Application Window to select “Skype”.

Move the highlight selection to “Skype” and push hands to click,

Magic iRIID Virtual Phone Interface will create Virtual Skype Keyboard for you.
On the Virtual Skype Keyboard, move hands to select key commands.

There are Two ways to make calls.

1. by click "CallPhone" to call phone number.
2. by click "Search" to search Contact List and send Text, SMS, make phone call to other Skype user.

Step 6: In "iRIID" window, If click “Skype” by Left hand, It will display “CallPhone” windows shows Numbers 0-9 windows for enter telephone to call. 9. You will noticed that Skype program is in Call Phone mode, and ready to be enter telephone number, You click the numbers to enter proper telephone number format: +Country Code, Area Code, and Telephone number. Example: for Canada and area code 905, phone number: 7300189 the telephone number correct format is +19057300189, and then click virtual key "Enter" to make call.

And Click “HangUp” to disconnect phone call.

Step 7: In “iRIID” Windows, if click “Skype” by Right hand, it will display "Skype" virtual command keys window.

Step 8: To test the 2nd way, click the virtual key "Search", the main window will display the “Search” window with virtual keys that help to search the first character 0-9, a-z from Contact list. You can select any first character that Skype user name in your contact list.

Step 9: Example: if you have Skype user name: Mydison save in the contact list. When you click "M-”, the Skype program will search, and show list included Mydison in contact list.

Step 10: You can click "Down" key to highlight Mydison and then click "Select" key. The Skype program will show Mydison info on the Right side of window.

Step 11: To test send text message, Click "SendText" key to show 0-9, a-z keys to type message and click "Enter" to send message.

Step 12: To test send SMS message, Click "SendSMS" key to show 0-9, a-z keys to type message and click "Enter" to send message.

In order Send SMS to work with other Skype user, you need to have save the telephone number of the user and have presetting it ready to use Mobile SMS for that user in Skype program.

When click "SendSMS", Skype program will know and ready to display a mobile icon, and you can type as same as text message and click "Enter" to send the SMS message to Skype user mobile phone.

Step 13: There is "EasySP" included most use Skype commands in1 windows for convenience can quickly to operate Skype.

Step 14: There is “LockUp” key in windows, user can click the LockUp key to temporary lock gesture input.

> **To Prevent Unintentional Click Input: Click LockUp Key to prevent unintentional gesture input during other business actitives.**
> Example: When selecting “AnswerCall”, and by clicking on LockUp, Magic iRIID will display LockUp windows.

This will prevent unintentional click; therefore user can continue to do other thing they want to. If user wants to control Skype again, then by clicking virtual "Skype" key, Magic iRIID Virtual Phone Interface will create Virtual Phone Interface. User can control Skype again.

Step 15: There other virtual keys and additional personalize window features are perform the similar way. Contact Support@Mydison.com

If Magic iRIID visual feedback not respond hand moving selection well,

N. User can switch hand to select (Left & Right both virtual keyboard)
O. Put down hands to disengagement and raise hands to engage again.
P. Move stand position or walk little bit to change position.
Q. If close Magic iRIID Virtual Phone Interface and open again, program will reset all original setting, including the "LockUp" password protection.

The recommend How to use Magic iRIID Virtual Phone Interface App for more productive way:

Step 1: Have all the users you call often ready and add in to Contact list; therefore, you can click few virtual keys to make call and send messages.
Step 2: When received phone call, video call, during the conversation.
Step 3: click "LockUp", You can do other work and Enjoy.

Simple steps as 1-2-3.
All other program applications control is similar with operation method above.

Hand-Sign Input Example:

Magic iRIID Virtual Phone Interface has Hand-Sign function

(You can hand grab action to hold virtual key)

Once you hold the virtual key, you can swing the hand in directions to enter same key repeatly.

This Magic iRIID Hand-Sign Input function is useful for repeating click on the same key, such as for search users in contact list, click "Down" keys or "Up" key, several times with easy hammer actions.

Magic iRIID total tracking, User allow to move, walk or sit within sensor camera view.

Magic iRIID Virtual Phone Interface support
